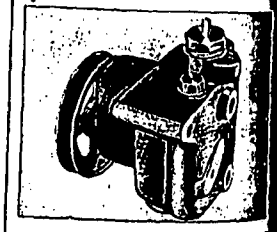
water cannot reach oil seal on air [illegible] Closed impeller is made of hard abr[illegible] resistant alloy. A built-in oiler lubri[illegible] all pump's moving parts. Oil chamber [illegible] one quart capacity for 24-hr normal op[illegible] tion. Pump is lightweight and has sub[illegible] tial welded-on handles that assure [illegible] lifting and moving from place to pla[illegible] Gardner-Denver Co, Quincy, Ill.

Masonry Drill Kit E17[illegible]

METRO CARBIDE MASONRY DRILLS are avail[illegible] able in a handy kit of six of the most com[illegible] monly used sizes, 3/16, 1/4, 5/16, 3/8, 1/2 and 5/8 in[illegible] covering a wide range of applications. *Sturdy* leatherette case, durably con[illegible] structed, protects the drills. Comes com[illegible] plete with operating instructions. Metro Tool & Gage Co, 4240 Peterson Ave, Chicago 30, Ill.



Midget Hydraulic Unit E177

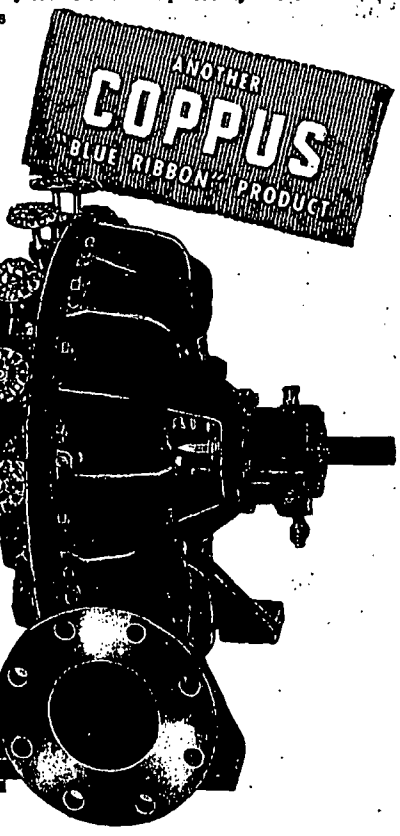
HYDRAULIC POWER UNIT serves many pur[illegible] poses for industrial operations, plant main[illegible] tenance and service repairs, as arbor press, hydraulic clamping vise, straightening and bending device. It consists of a hydr[illegible] power gear pump with hardened and ground gears running in bronze bearings; a compact housing to protect check valves;

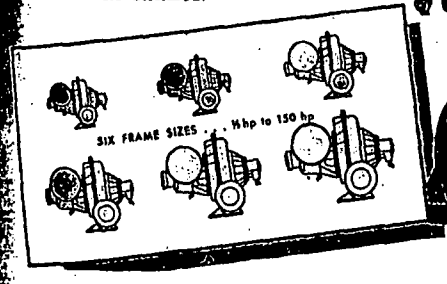
AVOID THE LUXURY TAX
on Idle Horsepower

When your horsepower needs are small, why pay the extra cost of larger turbines, designed for much more power than you require?

You pay only for the horsepower you need when you fit the right Coppus "Blue Ribbon" Turbine to the load. They're made in six frame sizes . . . from 150 hp down to fractional . . . priced in proportion to their size.

That's why you'll see more and more Coppus turbines powering pumps, blowers, fans, stokers and other equipment requiring a steady source of small hp. *Steady* is the word for these busy little turbines. Like all Coppus "Blue Ribbon" products (blowers, ventilators, gas burners, etc.) each Coppus turbine is precision-made, with close tolerances checked by Johansson size blocks. And before shipment, the turbine you get is dynamometer-tested.

No wonder more than 85% of all orders for Coppus turbines since 1937 have been repeats . . . and that a growing number of nationally known manufacturers are installing "Blue Ribbons" on their original equipment.




Write for Bulletin 135-10. COPPUS ENGINEERING CORPORATION, 165 Park Avenue, Worcester 2, Mass. Sales Offices in THOMAS' REGISTER. Other products in BEST'S SAFETY DIRECTORY, CHEMICAL ENGINEERING CATALOG and REFINERY CATALOG.
