E. K. JENSEN

Dear Mike:

The attached information on a Transite Substitute was passed on to me by Eleanor Jensen. I am not sure who in Tonawanda would be interested in this product, so I am sending the information to you. Please pass it on.

As you know, Transite contains asbestos. There are concerns when either maintenance or demolition work is done on Transite in that particulate matter may be generated and become airborne. Possibly some thought could be given to evaluate alternative materials if this has not already been done.

Very truly yours,

Nick.

Subject TRANSITE SUBSTITUTE

At the ORC Asbestos Symposium I attended this month, one of the presenters told of his company's successful use of Cem-FIL^{R} GRC Sheet as a substitute for asbestos containing transite. I have attached the Thomas Register advertisement of Cem-FIL^{R} Corporation. The appropriate personnel in the Linde Division may wish to evaluate this product.
