I believe it was agreed when we met with Dr. Calandra in December, that the group would schedule a monthly meeting and that we tentatively agreed to meet in Chicago at Calandra's Lab. on Wednesday, January 15. Because of the holiday season, it is unlikely that work has progressed at Calandra's to the point that a trip to Chicago would be worthwhile this month.

I suggest instead that we meet here at Creve Coeur at 1:30p.m. on January 15. A tentative agenda might be:

1) Joint industry-sponsored toxicology studies (Ref: Memo-W. K. Johnson to W. R. Richard, Dec. 30, 1968).

2) Current status

3) Detailed timetable for future activities--immediate and long range, with priorities.

Bob Keller has mentioned Item 3 and I hope that he, Scott and I can have something pretty definitive in the way of recommendations by the 15th.

I'll be checking by phone on Thursday the 9th or Friday the 10th to see if the 15th is convenient for a majority.
