RE: ALAIN BELDA MEETING

1. I have reviewed the list of "emerging" and "known" issues, and have no additional comments.
2. Audit Benchmarks: A list of Belda's locations scoring excellent is attached.
3. We cited the confidentiality of location audit findings as an impediment. Perhaps, Alain would be interested in the composite audit scores for the 53 audits conducted 1990-1993 (also attached).
