minutes, would that have done anything to your numbers?

A It may have changed the sweeping data because there would be less material, but I don't think it would have changed the other number.

Q Okay. Are you aware that in his deposition for this case Mr. Grewe's son indicated that the same activity would take a couple of seconds?

A No, I did not read Mr. Grewe's son's deposition.

Q I would like you just to assume for a minute that that is his testimony.

If you had tested the activity for only a couple of seconds, would that have affected your numbers?

A I don't think you can do the activity in a couple of seconds.

I mean, sanding the four brake shoes takes longer than a couple of seconds.

Q Again, your experience as a brake mechanic is what?
