P7297

Dear Elmer:

Enclosed are 2 copies of each of three invoices (A 6344, A 6345 and A 6347) for some of the studies with Aroclors, which you requested.

The cost on the fish toxicity studies is more than we had estimated originally, however there was considerably more work in the study than discussed when they were started. If you need further justification for the cost of this study, please let me know.

The invoice for the acute studies with HB-40 and MIPB-2 was sent previously.

A8831

We are not submitting a bill for teratology studies until we can decide exactly what to do. I think that we should at least conduct the type of studies recommended by Dr. Fitzhugh. Do you agree?

Sincerely yours,

M. L. Keplinger, Ph.D.
Manager, Toxicology
