Clin

TO A. E. Arvin AT Amherst, Mass. DATE September 25, 1969

FROM Richard Henderson AT New Haven, Conn. COPY TO File (2)

SUBJECT University of Michigan Study

PLAINTIFF'S EXHIBIT

DOW-504

Enclosed are copies of three pages from the University of Michigan report. In addition to the seven positive and two questionable mentioned in this report, there are also reports of positives from France and Belgium.

Note the recommendation that exposure to vinyl chloride monomer should be kept below 50 parts per million instead of 500 parts per million, which is the current Threshold Limit Value of the American Conference of Governmental Industrial Hygienists.

RH:eph
Encl.-pages 101-103.
