GENERAL ELECTRIC COMPANY

REDMOND CIRCLE, ROME, GEORGIA . . . . TELEPHONE Rome 4-2661

MEDIUM TRANSFORMER DEPARTMENT

November 4, 1963

Monsanto Chemical Company
800 North Lindbergh Boulevard
St. Louis 66, Missouri

Dear Sirs:

This refers to our license agreement dated October 17, 1950, as amended by letter agreements dated November 9, 1950 and January 20, 1953, relating to liquid dielectric material for electrical devices.

General Electric Company's new liquid dielectric material for electrical devices, known to the trade as transformer PYRANOL ® A13B3B, is the subject matter of its United States patent application Serial Number 201,630 for "Electrical Apparatus and Dielectric Material Therefor" filed June 11, 1962 in the name of Anthony J. Polito.

It is proposed that, effective as of December 1, 1963, the phrases "United States Letters Patents" and "Letters Patent" in the agreement dated October 17, 1950 be understood to include the above identified patent application and any United States patent granted thereon, except in so far as they relate to capacitors, provided however that until such patent is granted or until December 1, 1966, whichever occurs first, payments by Monsanto Chemical Company to General Electric Company, as provided in Article III of said agreement, for Monsanto's license under said application shall be termed a service charge rather than a royalty. If such patent has not been granted before December 1, 1966, then thereafter until such patent is granted no further payments shall be due General Electric for Monsanto's license under said application.

This letter is written in duplicate. If it is acceptable to you, please indicate and date your acceptance at the place provided below and return one copy.

Yours very truly,

GENERAL ELECTRIC COMPANY
