SUBJECT: LETTER FROM HARLEY HUTCHINS OF MAYER, BROWN & PLATT REGARDING

REFERENCE: PCB's and PBB's

TO J. C. Weber
B2SK

The attached letter requests a copy of a Bio-Test study on Aroclor 1242, 1254, and 1260 in white Leghorn chickens.

We need authorization to release this document to Hutchins. In addition, he asked for identity of doctors or experts who could advise them on PCB's or PBB's. You will also note that he asked for a meeting between Velsicol and Monsanto to discuss litigation problems.

It might be appropriate that you respond to this letter.
