brake linings.

Q Any other doubts?

A That's the main doubt.

Q Can you think of any others?

A That's the main one.

Q What was your source of information for this belief about chrysotile?

A Just in the literature.

Q Does that include the speeches and presentations made by Mr. Weaver of Raybestos-Manhattan?

A No, I don't -- no.

Q Isn't it true that years before this seminar, Mr. Weaver had given a presentation in Colorado where he specifically indicates that there was no medical or scientific support for distinguishing chrysotile as a lesser potent problem in terms of asbestos fibers than other types?

MR. FRIESTEDT: Object to the form, lack of foundation.

MR. MENDRZYCKI: Objection.

A Ike Weaver gave a talk I guess it was in Colorado about -- he was insisting that there was a real asbestos problem. There was a question in the early days of this whether there really was a problem. There was a time between
