Royalls Initial Report (8/20/85)

- p.2 middle – comment on ~~[illegible]~~ within + between site variation in ~~[illegible]~~ (ln BPb)

- Put burden on analysis of page (2) to get individual slopes

- Comment on Inter. of $\beta$ in Model (2) when $\beta_i$ are not all equal.

- Can't interpret DuPont results because of (2)

- Another model to examine
