CHASE BAG COMPANY
ESTABLISHED 1847

CHAGRIN FALLS, OHIO 44022

GENERAL LABORATORY

October 10, 1972

Mr. John Rauch
Georgia-Pacific Corporation
Bloomingdale Road
Akron, New York

Dear Mr. Rauch:

Our Buffalo, New York plant contract packages your joint compound and patching plaster and we would appreciate knowing if your product contains talc or asbestos materials. Also, would your product be classified as hazardous or toxic and should we use any precautionary procedures?

Very truly yours,

CHASE BAG COMPANY
General Laboratory

K. R. Linn

October 12, 1972

Mr. K. R. Linn
Chase Bag Company
Chagrin Falls, Ohio 44022

Dear Mr. Linn:

This will acknowledge receipt of your memo of 10/10/72. You have requested information regarding the talc or asbestos content of our materials. This information cannot be released at the plant level.

Please be advised that I have sent this request on to our Manager of Research and Development in Oregon. By copy of this memo I request that he reply directly to you regarding the material content, hazardous or toxic classification, and any precautionary procedures that may be required in repackaging the materials.

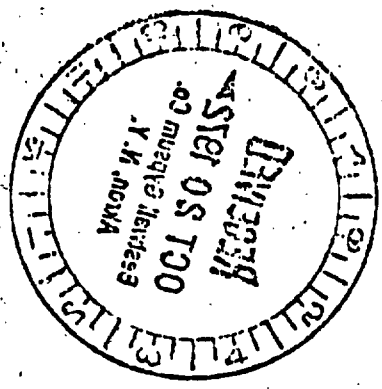

Very truly yours,

Georgia Pacific Corp.

Jack Rauch
Plant Manager

Mr. K. R. Linn
Chase Bag Company
Chagrin Falls, Ohio 44022

Dear Mr. Linn:

This will answer your letter of October 10, 1972 to Mr. Rauch, manager of our Akron plant. Our joint compounds and patching plaster do contain small quantities of asbestos. They do not contain talc nor do they contain any other ingredients which would be considered hazardous or toxic.

Please let me know if you require any further information.

Very truly yours,

C. W. Lehnert, Manager
Research and Development
