HANDLING ASBESTOS CONTAINING MATERIALS

Many materials contain asbestos. Some well known, some not so well known. When they do Engineering Department Procedure 7.6 is to be followed while handling them. One of the requirements of the procedure is to air sample at 6-month intervals to determine exposure. Following is a list of material containing asbestos used on the Plant. These materials should be monitored while being handled. Contact Tech Services for this service:

1. Haveg 41 and 61 pipe and equipment.
2. Epoxy and Polyester resins which may have had asbestos added as the thixolsopic agent.
3. Rope packing.
4. S-1 and G-1 gaskets.
5. Transite pipe and paneling.
6. John Mansville pipe.
7. Insulation.
8. Listing.tape and tubing
9. "A" Cloth.
10. Asbestos gloves.
11. Asbestos paper.
