Standard Eternawall

Georgia-Pacific Eternawall is vinyl, factory laminated to gypsum wallboard. Eternawall is designed for use in interior partitions and in high traffic areas of commercial and institutional construction. A pre-decorated wall system that goes up in one step. Just put up Eternawall and your wall is done. Completely decorated!

The inside is gypsum and that means . . .

- Sound control.
- Fire resistance.
- Strength.
- Lightweight.

The surface is vinyl. That means it's . . .

- Tough
- Colorfast.
- Flame and abrasion resistant.
- Durable . . . lasts in spite of hard wear.
- Easily cleaned with a damp cloth.

Eternawall is so durable, it can be reused, over and over. So, it could very well be perfect for demountable wall systems, too. This is quite a wall. Nothing's perfect, but Eternawall is the toughest, easiest, most people-proof wall we know of and that's close to being perfect!
