HIGHLIGHTS

We had eighteen total injuries this month: four were recordable; one days-away

1) A machinist lacerated his thumb while cutting shimstock and the wound required four stiches to close.
2) A non-exempt technician received a slight shoulder separation in a fall from one barge to another off-plant.
3) A Stores clerk fractured his middle finger when he caught it between two drums.
4) A pipefitter walking along the edge of a barge, missed the edge of the barge, and while falling, reached out with his right arm and caught himself on the dock causing a dislocation to his shoulder. (Days-away case)
