TWO WAYS TO CHECK YOUR FLUID SAMPLES

FLUID ANALYSIS

1.

Send Your Samples To: Findett Service Company, for analysis
Route 1, Box 13,
Elm Point Road
St. Charles, Missouri 63301

- Uniform analytical and reporting procedures make it easy for you to establish a regular sampling program.
- Fast, efficient service from a company experienced in fluid analysis.
- Equipped to give in-depth analysis covering:

  Specific Gravity (not generally necessary for Therminol®)
  Viscosity (not generally necessary for Pydraul®)
  Acid or Neut. No.
  Moisture
  Action Steps Needed

For more information, see the enclosed Findett Service Co. analysis form and price schedule.

2.

Many customers find it convenient to do their own sampling. Please write for standard analytical methods for determining:

- Specific Gravity (not generally necessary for Therminol®)
- Viscosity (not generally necessary for Pydraul®)
- Acidity
- Moisture

0173926

An equipment list is included in each analytical procedure.
