CHLORINATED BIPHENYL IN WILDLIFE

FF

Dave Wood
Brussels, Belgium

[redacted]

Would you please bring us up to date on chlorinated biphenyl in wildlife. More activity is going on in the States. We have some analytical work and some biological work underway to see if Aroclor is really present.

Has Baeyer, Progil and Kuhlman done any identification work? Has Jensen confirmed his initial publication? What chlorinated biphenyl isomers did we actually supply Jensen? Did Jensen ever forward any more analytical data or details to you?

E. Scott Tucker
