L. E. Hamlin, M.D.
Medical Director
American Brake Shoe Company
2501 Blue Island Avenue
Chicago 8, Illinois

Dear Ham:

I had only just gotten back from Europe when I had to take off again for Oak Ridge and Washington. Next week it is Boston and New York, and the following week, Pittsburgh. So it goes!

Unfortunately, I have been unable to make any great progress with respect to the Atlas, principally because of circumstances involving the Radiology Department here. As you know, Ham, Doctor Robert has elected to enter the private practice of radiology with a hospital in New Orleans. We have been considerably concerned with the problem of finding a man to replace him. However, we have now succeeded and have effected an affiliation with Johns Hopkins University. Within the very near future, a radiologist will join our staff on a full time basis, and I believe our department will be much stronger than heretofore.

Upon completion of our studies of the experimental work we are carrying on for the American Brake Shoe Company, we will be happy to discuss with you the matter of publishing the results. We look forward to your visit shortly after the first of the year.

Please know, Ham, that we are extremely grateful to the American Brake Shoe Company for their contribution to our studies here at The Saranac Laboratory.

With very best regards,

Sincerely yours,

Arthur J. Vorwald, M.D.
Director
