Dr. Alan Mehler
School of Medicine
Marquette University
561 N. 15th St.
Milwaukee, Wisconsin 53233

Dear Dr. Mehler:

I am glad that Bernie Wildi was able to reach you and that you are available to meet us at the Industrial Bio-Test Laboratories in Northbrook, Illinois on Friday, March 21.

I believe Bernie gave you some indication as to what our problems are in connection with one of our major product groups, the Aroclors or polychlorinated biphenyls.

I have enclosed a number of items which will give you a more detailed view of the situation. I hope you will have an opportunity to review the enclosures before we meet on Friday.

The enclosures include:

Enclosure I - Jensen & Widmark's original lecture - "Confidential" November 1966

Enclosure II - "Chlorinated Hydrocarbons in British Wildlife" - Holmes, et al - Nature, October 21, 1967

Enclosure III - "Polychlorinated Biphenyls in the Global Ecosystem", Risebrough et al - Nature, Dec. 14, 1968.

Enclosure IV - "A Menacing New Pollutant" - S. F. Chronicle, Feb. 24, 1969

Enclosure V - Statement from Monsanto, March 3, 1969

Enclosure VI - "DDT: The Critics Attempt to Ban its Use in Wisconsin" - Science, Feb. 7, 1969.

DSW 201087

Five of us from Monsanto in St. Louis will be arriving at the O'Hare Airport at 8:15 a.m. on Friday. There we will meet Dr. R. L. Metcalf from the University of Illinois who is also going to sit in on the meeting Friday; perhaps, you know Dr. Metcalf.

We will either be picked up at the airport or will arrange transportation to the laboratory and should arrive there about 9:00 a.m.

I am looking forward to meeting you.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health
