Mr. Elmer P. Wheeler
Industrial Hygienist
Monsanto Chemical Co.
1700 S. Second Street
St. Louis 4, Mo.

Dear Elmer:

Thank you very kindly for your letter of August 29, 1955 in relation to the toxicity of Pydraul 150. From a copy of my letter to Dr. Hodge you can see that I have corrected my error in regard to composition.

I have not changed your statement on Page 2 of the copy to BuShips in regard to Aroclor 1242, since the pathological changes were ruled out in the case of Aroclor 1242. They were not completely ruled out, however, in the case of Aroclor 1254.

Get your horn-pipe and little round white hat ready, I am chafing at the bit to hit the briny deep with you if it can be arranged. Couldn't we take Zisman along and put him on a ration of 150 only.

Should any equipment be taken along to collect air samples?

Sincerely yours,

Joe

P.S.: I have looked over your request concerning the analysis of isocyanate; we are interested but wish to give it a bit more thought before giving an estimated cost.
