cc: Mr. W. C. Strader

Mr. Wallace F. Armstrong — Ethyl Tower

R. C. A. Bock, M.D. — Baton Rouge Plant

Asbestosis — July 15, 1970

PLAINTIFF'S EXHIBIT

ETCO-626

Last year a review was made of insulators and their work environment. Nothing of significance was revealed.

The diaphragm preparation job was inspected and no further evaluation was then deemed warranted. However, recently, following your inquiry, this job was specifically studied. No actual hazard is apparent and no action recommended.

We intend to maintain an awareness of the potential hazard of asbestos minerals and their use throughout the plant.

Roy C. A. Bock, M.D.
