Dear Mr. McDaniel:

Enclosed are dust count data taken on January 9, 1969. Weather: Cloudy, moderate wind from the south-east. Personnel in the bagging areas were equipped with respirators. There was no dust leakage visible from the overhead screw conveyors under the product storage bins. Opened Standard Grade was being packaged. The dust counts were made off the premises.

Sample	Location	MPPCF
Blank - 3		
24	Bagging Area	14.1
26	Same as above	10.9
49	Palletizing Area	9.8
57	Same as above	9.8
58	General Refining Area	3.4
69	Same as above	3.5
65	General Rock Fiber Area	3.8
71	Same as above	3.7
69	North Fence Line	4.2
75	Same as above	4.5
88	South Fence Line	3.1
95	Same as above	3.7
109	Shifters Office	3.4
195	Same as above	3.6

We have received the literature for the Phase Microscope, and it is on order.

Very truly yours,

D. S. Kamens

Dear Mr. McDaniel:

Enclosed are the monthly dust count analyses for the King City operation. Weather: fair, cold, brisk wind from the north west. Included in the sampling are two set of counts taken in the RG-244 circuit. Operators in both packaging areas were equipped with respirators and the areas were isolated with closed doors. Standard Grade 210 powder was peing packaged, and the palletizer was in use. There was no visible dust leakage from the overhead ducts. The phase microscope we ordered from Unitron has been back ordered until approximately March 1. We have not ordered any sample collecting apparatus, paper, or oil pending information from you regarding exactly what to purchase.

Very truly yours,

D. S. Kamens
