Re: Pretreatment Compliance Inspection Report
NPDES No. SC0036056, SC0036081, and SC0001741

Dear Mr. Thompson-King:

Thank you and your staff for the time and cooperation extended to the representatives of the United States Environmental Protection Agency, Region 4 during the Pretreatment Compliance Inspection that was conducted during August 30-31, 2023. Following this comprehensive review, the EPA found that Chester Sewer District's authorized program has aspects which are operated in a satisfactory manner, however there were a number of compliance concerns identified.

Within 20 workdays of receiving this letter, please provide the EPA with a written response to each Required Action identified in Part IV of the enclosed report, including your actual or proposed timeframes for completing the corrective actions. For your reference, Attachment B to the report is a copy of the draft 2019 Pretreatment Compliance Audit (PCA) report that was withheld due to the subsequent pandemic-related disruptions. A response to the PCA findings is not required, but we will consider your response if you choose to remit one. Please e-mail your response and direct any questions you may have to Mr. David Phillips, at (404) 562-9773 or phillips.david@epa.gov.

Sincerely,
DAVID
PHILLIPS
