November 7, 1958

Mr. Fred M. Younger
Younger Laboratories
5620 Telegraph Road
St. Louis 23, Missouri

Dear Fred:

We are sending under separate cover an additional sample of OS-95 for decomposition products study.

Would you please expose some animals to the material, allowing it to drop on a metal or other surface heated to 1000°F. (Essentially the same as you have done with Pydraul 625 under Project No. Y-58-31 except for the temperature).

This will be Project No. Y-58-46.

Very truly yours,

Elmer P. Wheeler
Assistant Director
Medical Department
