Monsanto

MONSANTO COMPANY
800 N. LINDBERGH BLVD.
ST. LOUIS, MISSOURI 63166

Dear Frank:

The purpose of the attached factsheet is to let you know that PCBs:

--ARE NOT "cancer-causing agents"

--ARE NOT "deadly toxins"

--ARE mildly toxic and do not break down in the environment.

Please read the enclosed information. Keep it on file for reference the next time you're doing a story on hazardous waste or PCBs.

Thank you for helping dispel misconceptions.

Christy Beckmann
