Western Precipitation
(Joy Manufacturing)

B2SK W. B. PAPAGEORGE

Bill, I can only find one record on our February, 1970 PCB letter listing related to subject company. A letter was sent to Director of Purchases, Joy Manufacturing Co., 900 Woodland Avenue, Michigan City, Indiana.

We cannot find any record that the February, 1970 PCB letter or the June, 1970 food letter was sent to Western Precipitation, a division of Joy Manufacturing in Los Angeles, Calif.

We have, since June of this year, been in touch with R. W. Dagnais, Sales Manager; Tom Yousch, Sales Engineer; and Dennis French, Sales Engineer at Western Precipitation concerning Therminol FR installations using Western Precipitation Holo-Flite equipment. On August 17, Bob Dagnais sent the attached listing of Holo-Flite equipment on Therminol FR-1 fluids. Tom Yousch and Dennis French were quite helpful in the East Coast Terminals problem when it first came to my attention on July 13. The information received from Yousch and French is included in my report on East Coast Terminals of July 19.
