TLV 10ppm

wouldn't categorically rule out its use but at same time it should be recognized that it is a toxic solvent.
also consider effect on paint + rubber!

Halpin
no plans to reformulate
can coatings to R-66

UGY 189 R-66 for Calif.

but could reformulate if need to

6-12 mo. needed to revise R. 1

Most can coaters use direct fired ovens so ~~probably~~ would be under oven reg. anyway
