September 3, 1953

Mr. Earl Reverski
Bestwall Gypsum Company
Grand Rapids, Michigan

Dear Mr. Reverski:

At the request of our distributor, George A. Rowley Company and our sales engineer, Wade Duym, we are requesting our new asbestos mine, Carey Canadian Mines, Ltd., to forward a 100 lb. sample of 7D for your evaluation. We understand Mr. Watt, Bestwall Gypsum Research Center, Paoli, Pennsylvania, is also writing to you about this sample.

Not only is the 7D a very clean and uniform grade of asbestos shorts, but the color is very light.

We are confident that Bestwall Gypsum will be very pleased with our new grade.

Very truly yours,

A.H. Bagenstose
