COPY

Mr. A. B. Gerber
W Dunlop: note & return

GENERAL ELECTRIC

COMPANY

100 Woodlawn Ave.
Pittsfield, Mass.

April 9, 1941.

Dr. R. L. Jenkins
Monsanto Chemical Company
Anniston, Alabama.

Dear Dr. Jenkins:

We have already sent you the complete copy of all the new specifications for the Pyranols as requested in your letter of April 4. This is an exact duplication of the material which we gave the St. Louis Works.

In your letter of April 4 you ask for a second copy. We will assemble a second copy and send it to you.

We are marking copies of our test reports to be sent to Mr. Gerber whenever the report refers to material manufactured at Anniston. Do you wish to have a copy of each of these reports also sent to you?

We note that the Anniston Works is still measuring color in terms of the NPA scale. Please note that we have shifted over to the APH scale.

We note that the certificate of test given us on material manufactured at Anniston does not include the refractive index or the dielectric constant values. We would appreciate it if you would supply us with this information as a routine matter.

Yours very truly,

fmc/mp

F. M. Clark.
