CUE, [illegible] September,

The Manager,
Australian Blue Asbestos,
[illegible]

Dear Sir,

Following recent inspections of your mine workings and after reading a report made by one of our Ventilation Officers, I must request that continued attention be given to laying dust in all underground places by the use of water. Dust counts are relatively high and must be brought to a minimum.

I know that it is your desire to keep your fibre as dry as possible, however this consideration must be given low priority regarding the health of workers.

I must therefore instruct that all working places be issued with a hose so that all broken dirt, backs and walls may be wetted.

DISTRICT INSPECTOR OF MINES, CUE.

Limited basis:
on priority given to health of workers.

Julie - with a heavy heart - the doct Ex 67 and - the listing of documents - should be noted with verbatim actual quote from judge on the limited basis of the acceptance of tender.
