GEORGIA-PACIFIC

INTERDEPARTMENTAL COMMUNICATION

DATE: May 16, 1973

TO: Mr. E. B. Hollingsworth

LOCATION: Wilmington

FROM: H. W. Poole

LOCATION. Wilmington

SUBJECT: AKRON CHEST X-RAYS

PLAINTIFF'S EXHIBIT GP-245

This will confirm our conversation regarding the Akron, New York plant's Pre-Employment Physical Examination.

OSHA regulations require chest X-rays for employees who are exposed to asbestos dust during pre-employment, annual and terminal physicals. All new employees are subject to working in this area; therefore, the Akron pre-employment physical will include a chest X-ray, and this policy will continue until the use and handling of asbestos is discontinued.
