Subject: Booklet re Asbestos Dust

Recently I received a copy of a little booklet on asbestos entitled "Caution: Asbestos Dust is Hazardous to Your Health!" which had been sent to me from the National Institute of Occupational Safety and Health. I am sure that many individuals who have varying degrees of interest in asbestos are in receipt of this booklet. I am taking the liberty of sending you a copy since I am sure you will find some material contained therein which may be worth noting.

C. C. Blackwell, Jr., M.D.
