Subject: PROTECTIVE CLOTHING

The protective clothing programs and estimates have been reviewed. Please proceed with appropriation submittals.

For your information, one plant is using a sand filter on discharge to sewers. This was requested by their municipality.

If there are any questions, please advise.

Subject: PROTECTIVE CLOTHING

As suggested in your 8/2/77 letter, we have developed the following proposal for protective clothing.

A. Employees to be Covered

1.	Willow Operators (3) will change coveralls each day. Estimate usage - 10/person/year @ $20	$600
	Disposables For Fill-ins @ $2.35 x 100 Occurrances	$235
2.	Other Production Personnel Disposables @ $2.35 x 100	$235
3.	Maintenance Personnel - Raw Asbestos Disposables @ $2.35 x 500	$1175
4.	Receiving Personnel - Raw Asbestos Disposables @ $2.35 x 200	$470
	(Estimated usage for disposables based on first 6 month 1977)	$2715

B. Maintenance of Clothing

1.	Disposables to be ordered by Transite Dept. and transferred to designated departments. Disposables to be issued by foreman.	
2.	Coveralls to be ordered by Transite Dept. and issued by foreman.	
3.	Coveralls to be washed by Transite janitor (no additional manpower required).	
4.	Replace present washer and dryer.	$1200
5.	Miscellaneous supplies and clothing repair.	$100
		$1300

C. Facilities

Locker room for Willow Operators with laundry and shower facilities 250 sq. ft. to be constructed near willow area.	$10,000

The first year cost for this plan is $14,015 and $2,815 per year thereafter. We are presently spending $4,000 each year on disposable clothes for Willow Operators, Maintenance, Receiving and other production personnel who work around raw asbestos. Also, our present washer and dryer are in need of replacement. Therefore, the program to supply Willow Operators with coveralls will save money except for the one time cost of $10,000 for the locker, shower, and laundry facilities. These facilities will only be used by the 3 Willow Operators and the Janitor who washes clothes. The separate facility is needed to prevent raw asbestos from contaminating the regular locker room.
