J. D. Woods

Subject: Air Sampling - Industrial Hygiene — Saline

This letter is written to request the services of Industrial Hygiene. We are still a young Plant; however, some of our employes are now retiring

We have had several of these employes file compensation suits, claiming lung injury due to smoke, dust and vapors in the air in our Injection Molding department. While we feel there is no merit to these claims, we cannot ducument thoir falseness. Three cases have already been heard; however, should the ruling be in the favor of the employes, a study should preclude any future ruling against the company.

N. S. Tracy
Safety Engineer
