COMPANY CONFIDENTIAL

June 12, 1972 PCB Meeting

Stewart	Horner	McCutchan
Leisy	Engman	Heisler
Hippe	Foresman	Campbell

1. How do we define no knowing discharge?
2. What is the timing on an implementation Schedule?
3. Do we collect PCB data on fish and river water?
4. Are mono chloro biphenyls considered a PCB?
5. Do we restrict our thinking to:
   Department, Incinerator, Rip track
   Plant Sewers 24" & 30" North? Lab Sewer
   Dept. 217 Sewer
   Waste Treatment Plant Influent-Effluent
6. Should we attempt to verify reserviors of PCB's and/or leaching action by background water and cross contamination in plant sewer system- Do we ignore or do we clean and/or repair?
7. Is present methods of analysis satisfactory?
8. Should we have comparative results using our method and the governments'?
9. Do we get specific with Feds related to sampling procedure?
10. What type of sampling data do we present and how are data presented?
11. Who presents data to Feds.
12. Is there a plant spokesman (interface with Feds) or from G.O.
13. What legal counsel should be employed?
14. With what other legislation must we be concerned?
15. Do we invite, restrict, delay, encourage Fed inspection of plant facilities?
