
Everything you're looking for in a heavy-duty engine bearing is inside this box.
Leading heavy-duty original equipment manufacturers specify these bearings. And the same manufacturer who supplies them to the original equipment manufacturer supplies them to NAPA as replacements. Why don't you replace the original with the originals?
The right engine bearing must have the right engine bearing lining material. NAPA gives you the replacement bearing that meets stringent original equipment specifications.
NAPA covers the full line of heavy-duty engine bearings. Availability is our strength. We have the engine bearings you need, when you need them.
NAPA Heavy-Duty Engine Bearings are carefully engineered for proper load-carrying capacity, conformability, embedability and wear resistance.
NAPA jobbers and quality NAPA parts are easy to find. Just check the Yellow Pages of your telephone directory.
