Monsanto

FROM (NAME & LOCATION) P. W. Gann - B2SF

DATE May 9, 1973 CC

SUBJECT PCB Warning Letters, June 8, 1970
Fallon Letter

REFERENCE

TO Memo to File

A copy of the March 1970 IBM "B1131-A, Direct No. 2, 4/16/70" IBM report for the Organic Division is believed to be the basis for preparing the mailing list of this June 8, 1970 letter of J. R. Fallon. The actual copy of the IBM run used is filed in the "IBM runs" section of the permanent file on PCB warning letters.

Included in the warning letter file is the original copy signed by J. R. Fallon, the original copy of the mailing list, salesmen follow-up lists and lists indicating systems converted. Also, is the original copy of Olson's letter to P. S. Park and R. E. Kelley dated May 5, 1970 wherein he obtained their respective approval for the letter.

These papers are in themselves a type of progress report of the efforts that Monsanto made in mid-1970 to warn Therminol FR customers in the food-related industry of the PCB hazard and the importance of converting to a non-PCB fluid.

P. W. Gann
