Gentlemen:

Please forgive me for not being clear in my original letter. Here's what we really want to know. As one of your customers we are interested in knowing if it's possible to buy products from you that contain Crocidolite fibers. If so, please list these products giving the percentage of Crocidolite contained in each.

Yours truly,

M. A. Nicholas
Stores & Shipping Superintendent

RE: Crocidolite Asbestos

E.I. DuPont De Nemours & Company
P.O. Box 1089
Orange, Texas 77630

ATTENTION: Mr. M.A. Nicholas - Stores & Shipping Supt.

Dear Sir:

We wish to acknowledge and thank you for your May 13th letter on the above material, which was forwarded to us by Beaumont forhandling.

Since many of our style of materials contain asbestos, we would appreciate your advising whether you are interested in a specific type material. Just some of the Garlock products that contain asbestos would be our braided packings, our compressed asbestos and woven asbestos sheet and gaskets, our spiral wound gaskets, expansion joints, etc etc. Are you perhaps interested in one particular type item, such as a compressed asbestos material perhaps meeting DuPont code S1, or perhaps the asbestos used in spiral wound gaskets?

Your clarification on the above, particularly if you can narrow down the field, will give us a much better chance to give you a prompt and accurate answer.

Thanks for your help in this matter.

Sincerely,
GARLOCK, INC.

J.K. McCloskey

RE: Crocidolite Asbestos

E.I. DuPont DeNemours & Company
Sabine River Works
P.O. Box 1089
Orange, Texas 77630

ATTENTION: M.A. Nocholas
Stores & Shipping Supt.

Dear Sir:

We wish to acknowledge and thank you for your May 21 letter.

As we discussed recently, Garlock supplies to our various customers a great number of styles and different type materials that contain Crocodilite asbestos. Exact percentage information is not readily available, and if further information is needed, we would very much appreciate you reviewing the information shown below and clarify if you can the type of material that you are specifically interested in. As stated in my May 17th letter, narrowing the field so to speak would allow us to request information on a limited number of styles or materials from our main plant location and enable us to give you a more prompt and accurate reply.

To give you an idea as to some of the materials that contain Crocidolite Asbestos, we list some examples:

1) In compressed asbestos, Garlock Style 7705 is a good example. This material meets both DuPont code S9 in sheet form, and G9 in cut gasket form.

2) In braided packings, Styles 230, 5557, 5298, 5880, & 5881. Style 5557, happens to meet a DuPont code R-4B, and our Style 5880 meets DuPont code R-51.

3) In spiral wound gaskets, DuPont codes G-62, 63, 64, 65, and 66 when "blue african asbestos" is specified.

4) Style 8554 and 9026 fillers for TEFLON envelope gaskets.

con'd..... DUP 112053

5) In woven asbestos sheet and tape materials, Style 8406 and 7424, which also happen to contain TFE.

As you can see from above, the sampling is a bit lengthy and covers a number of various materials. Any further clarification you can give us will allow us to request additional information from main planton a limited number of items.

We very much appreciate the information you gave us in our recent conversation, and look forward to servicing you in the future.

Sincerely,

GARLOCK, INC.
