LIST OF QUESTIONS ASKED BY INSULATORS
DURING AND FOLLOWING SAFETY MEETING

1. What are early symptoms of Asbestosis? - similar to emphysema
2. Can Asbestosis be cured and how? - process can be arrested - reversible? only know how to prevent
3. Can Insualtors have more frequent respiratory examinations?
4. Why did Construction switch from Unibestos to Thermasil?
5. Will Construction quit using code 502.1 (one - coat) cement?
6. Is Unibestos the safest Insulation to use? - no one knows in or outside of Co.
7. Will the Company:

   A. Furnish Insulators coveralls?
   *B. Install vacuum system in shops to replace brooms? - should vacuum vs. sweep
   *C. Provide dust collection system for exhaust fan? - " , if not already used
   D. Put Emiron on floors?
   E. Allow Insulators to see their X-rays?
   F. Have labor group housekeep on large overhaul jobs (example: SM - 15) to save Insulation time?
   *G. Isolate saws from rest of shop? - should do & also provide a dust pick up system

*Indicates Supervisors questions.

All questions now answered - Adams will send write-up of answers next wk -
