DISTRICT HOSPITAL

KALGOORLIE.

JMcN:PG.

Date 2nd October, 1961.

Mr. H. A. Telfer,
Under Secretary,
Mines Department,
PERTH.

Dear Sir,

I feel that it is imperative that a meeting be held between the Management of Australian Blue Asbestos and representatives of the Mines and Public Health Departments. This could perhaps be arranged, if you are agreeable, for Tuesday, 10th October, when both Mr. Boyland and I will be in your Department. We have both visited Wittenoom and the most recent dust counts show that a serious health hazard exists.

Dr. Bruce Hunt has written me concerning a man dying in Perth Chest Hospital from a disease contracted at Wittenoom. I know the patient and confirm Dr. Hunt's diagnosis. I have many other men seriously affected by silicosis and asbestosis. One man has died of a cancer attributable to 2 years work in the Mill. Mr. Collard, General Secretary, Australian Workers' Union has also consulted me and expressed grave concern over working conditions. He stated that he intended to pursue the matter further.

It would appear that repeated advice and warnings about the health hazard from dust have been ineffective and that stronger action will have to be taken.

Yours faithfully,

J. McNulty
CHEST PHYSICIAN.
