AT Antioch

DATE September 9, 1974

COPIES TO H. C. Dupuis, J. D. Hodges, G. B. Kirk, W. D. Myers, A. F. Raffaelli

FROM T. V. Smith
AT Antioch R & D
(released in his absence)

SUBJECT PROJECT WORK DURING WEEKS OF 9-9, 9-16 and 9-23, 1974

Al

(1) Newark Distribution Center - Repair of X-Terior test wall (9-9 and 9-10).

(2) Job tests on Mon. asbestos K-Spray.

(3) Plant batch of non asbestos Cover-tex (plant supervision and full product testing and release to sales for job testing).

(4) Lab batch of 3 Purpose Casein-Starch formula using raw gypsum. Run full product testing and recommend plant batch.

(5) Screen analysis on March paper fiber and develop specifications for paper fiber such as wet bulk, water requirement, dry bulk or density and stain tests.

Warren

(1) Development work on non-asbestos Premix products.

  (a) Improve mixing properties of Topping Compound after storage.

  (b) Develop formulation for new Dual Purpose Compound. Recommend for plant batch, and perform full product testing prior to release to field for job evaluation. Target date for release to sales for job testing: September 30.

(2) X-Terior Joint System test program.

  (a) Meeting with Jack Hodges at C.F.T. on Monday, 9-9-74.

  (b) Testing at C.F.T. on Thursday with Jack Hodges (9-12-74).

  (c) Monitor next plant run of X-Terior Joint and Texture Compound.

(3) Quality control testing on Delanco and Jacksonville.

Warren (cont.)

(4) Continue assistance to Antioch quality control checks to establish uniformity between plant and quality control lab.

General Work

(1) Lab clean-up.

(2) UV Chamber - Complete installation and wiring of UV tubes.

(3) CPR investigations.

(a) San Diego - Complaint on soft wall texture. Claim will not paint without roller lap marks. Samples of texture and paint to be sent in by George James and Don Deya.

(b) South Carolina complaint - Discoloration over topping compound. Samples and additional information to be sent in by sales and Tom Smith.
