Dr. Morris Weinberger
Director, Division of Pathology
Bureau of Foods, Room 5058
Food and Drug Administration
200 "C" Street, S.W.
Washington, D.C. 20204

Dear Dr. Weinberger:

Per Dr. Kolbye's letter dated March 22, 1976, and your telephone inquiry of May 17; we are forwarding the liver slides from all, except two dogs, of our two-year oral feeding study (IBT No. C7299) for your review.

The box consists of a total of seventy-six slides. The animal and slide identification information is on the attached sheet and also appears on the slides. The slides are filed in the same sequence as the animals are listed. The letters "A", "B", and "C", on the list and slides refer to Aroclor 1242, 1254, and 1260, respectively. The control animals for all three test materials were shared (common controls). The missing slides from the two animals (Male No. 28, Group T-IIIC; Female No. 31, Group T-IIIB) will follow as soon as we locate them.

Sincerely yours,

D. E. Gordon
