* TO RECEIVE DETAIL SECTION

TITLE: WATER POLLUTION: AROCLOR CONTROL

PERSONNEL: M. Pierle (C. F. Buckley)

PROBLEM: To determine source and quantity of Aroclor losses to the sewer.

SUMMARY

Aroclor losses are confined to Departments 238, 217, 218, 243, 245, 246, 258, 270, 273, and 275. Department 245 is now hauling 3600-4800 gallons/year of spent aroclor to the Monsanto landfill. The remaining major source of aroclor in the sewer is Department 246. From yield losses it is estimated that these losses total 40,000 #/yr. to the sewer. A project with estimated cost of $10,000 is presently being developed to minimize the Department 246 losses.

Water and mud samples are being taken to determine both the actual plant losses and the effect of W.G.K.'s outfall on the aroclor levels in the Mississippi River.

Mike,
New 248 will use
Aroclor furnace.
See Weber
