Mr. F. J. Kallin
Manager of Facility Environmental Control
The Ford Motor Company
Dearborn, Michigan

Dear Mr. Kallin:

In our letter to you under date of September 23, 1969, we made inquiry as to the extent of use by the Ford Motor Company of chlorinated biphenols in its hydraulic fluids and coolants and made specific reference to the Monsanto Company's product which is marketed under the trade name of Aroclor.

The letter was written in an attempt to determine if this material was in widespread use by industry so that we could better evaluate any possible water pollution problem that might exist. It was not our intention, however, to single out only the Monsanto Products, but to alert you to the possible hazards of all similar or related products, regardless of the manufacturer.

There has evidently been some misunderstanding caused by our previous letter which we hope will be corrected herewith.

Very truly yours,

WATER RESOURCES COMMISSION

F. B. Frost
