Dutch Boy Diamond White Enamel...
... is the ultimate in interior finishes. Its dense, gleaming white film is extremely high in hiding. An extra amount of the most brilliantly white pigment available (higher in light reflection than even crushed diamond) provides it's high hiding power and unique non-yellowing properties. It flows on readily, without sagging or brush marks, and is engineered to provide a uniform film on the sharp edges of furniture and cabinets. The absence of a strong paint odor makes it pleasant to use.
When dry, Diamond White Enamel provides a finish that can be likened to top grade porcelain. It resists marring, won't chip or crack, resists moisture and repels oils and stains. The finish can be washed repeatedly without appreciable loss of gloss, appearance or color.
The superior white enamel for elegant homes.

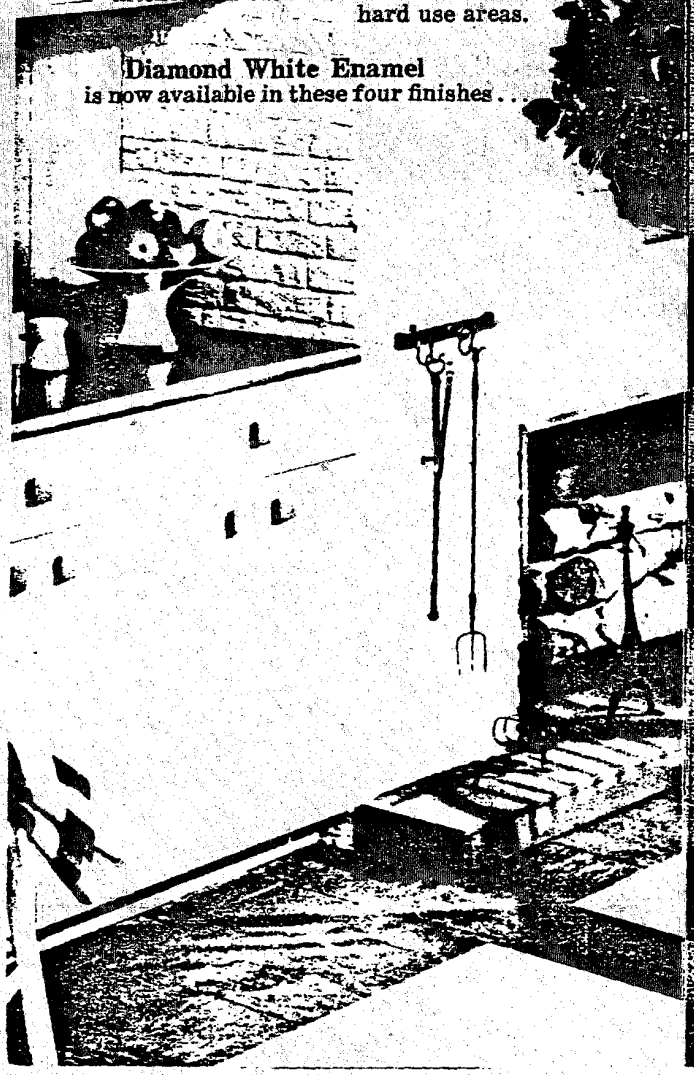
Dutch Boy Diamond White Enamel...
is unsurpassed for whiteness by any other enamel, providing a unique, gem-like, blue-white finish that complements any decorative style. It stays white, too—will not yellow with age. Convenient and easy to use, and without a strong, unpleasant paint odor.

Diamond White provides a tough, durable finish that can be scrubbed repeatedly. It is excellent for use on interior doors, cabinets, wainscoting, kitchen and bathroom walls and other hard use areas.

Diamond White Enamel
is now available in these four finishes...



717 Gloss
A brilliant, mirror-like finish.

11-17 Semi-Gloss
Smooth, lustrous sheen.

11-16 Satin Sheen
An elegant, silk-smooth finish.

817 Flat
Completely without sheen or gloss.
