Mr. ELMSLIE		✓

Dear Sir,

FIBRE - Complaints : Your P.203. We are much perturbed regarding the complaints from Wunderlich Ltd. regarding the quality of fibre, and we shall endeavour to do all we possibly can in the matter.

I can assure you that we are constantly observing this matter. It is part of the daily routine inspection of the staff, but I would state that the ability of the staff to effect the necessary improvements are limited, due to inefficiency of the plant.

In the future we intend putting into operation a code or key system which will indicate at what period any bag of fibre was manufactured.

Each bag will be marked as follows :-

The letter A and figure 9 will indicate that the particular bag was manufactured in January (A) and 9 indicates that it was manufactured in 1949. B Substituted for A indicates 2nd period 1949, C indicates 3rd period 1949, and so on throughout the year.

ANSWERED

You will appreciate that some of the asbestos bags can, and may be, stacked at the wharves for many months and even years, and we cannot locate the time it was manufactured.

It is appreciated that introducing the system cannot improve the quality, but it will assist us in checking our efficiencies.

We would also state that our sampling and assaying methods are very crude, and call for much improvement.

Yours faithfully,

AUSTRALIAN BLUE ASBESTOS LTD.

MANAGER.
