SUBJECT : AROCLOR HANDLING

REFERENCE : VJH : jf

TO : Doug Hardy - MCL London

David Wood told me you could probably help us on the problem described in the attached memo.

Actually, mainly from the psychological point of view , I think it would be useful if you could advise these people of some sort of hand cream they could use. This would bertainly be more effective than telling them that they have not handled the product with the necessary precautions, and that the skin irritation will disappear when they no longer handle Santotherm.

Many thanks for your cooperation.

VJ Héroufosse
