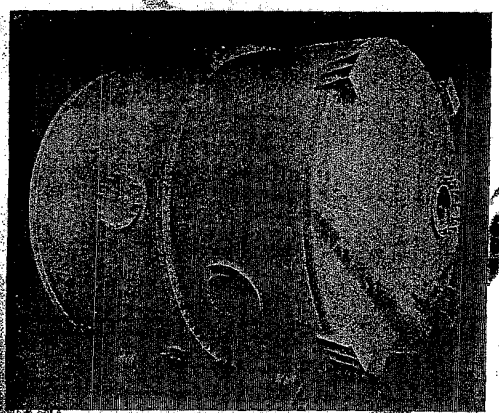
Cut Costs IN HANDLING CORROSIVE LIQUIDS

by installing HOMOGENEOUS LEAD LINED OR LEAD COVERED EQUIPMENT



A Homogeneous Chemical Lead Lined Vacuum Tank

"United" Products

We also manufacture a complete line of Chemical Lead Lined Pipe, Fittings, Valves, Coils, Tank Connections, as well as HARDLEAD Acid Pumps, Fittings, Valves and Cocks.

PROFIT is frequently a matter of lower replacement costs—particularly in the process industries where original equipment is expensive and shut-downs for repair even more expensive.

This is why homogeneous lead lined or lead covered equipment has been adopted by so many plant managers. Perfect union between the lead and other metal—so perfect that the two are inseparable under vacuum, pressure and temperature variations up to within a few degrees of the melting point of the lead itself—combined with the well-known corrosion resistance of lead make this equipment the ideal answer to many problems in handling corrosive liquids.

We invite consultation on any equipment of this nature. The wide experience of our engineering staff is at your disposal. Simply address Technical Department A.
