Mr. John H. Craddock, Director
Product and Environmental Safety
Monsanto Industrial Chemicals Company
800 North Lindbergh Boulevard
St. Louis, MO 63166

Dear Mr. Craddock:

Mr. Joe Nasiff contacted me today and informed me that Monsanto had approved funding for the continuation of our PCB research. Joe indicated that you needed to know how, when and where the money should be sent.

As before, the money should be sent as a directed gift to the Department of Dairy Science of the Ohio Agricultural Research and Development Center. The check must be made payable to the Ohio Agricultural Research and Development Center. The cover letter should specifiy that it is in support of our on-going polychlorinated biphenyl research but should not identify any specific area or project. Following is a sample of a suggested cover letter.

Dr. John Hibbs
Associate Chairman
Department of Dairy Science
Gerlaugh Hall
Ohio Agricultural Research and
Development Center
Wooster, OH 44691

Dear Dr. Hibbs:

Enclosed please find a check for $6,000 from Monsanto Company. This check is a directed gift to the Department of Dairy Science of the Ohio Agricultural Research and Development Center in support of Dr. Willett's on-going research on polychlorinated biphenyls. As you are aware, Monsanto is very interested in this area of research and we request that you keep us informed as new information becomes available.

Sincerely,

0755766

During the last several weeks I have gotten our new project on line and have the first 125 samples collected in the laboratory. In order to finance the job so far I have had to "borrow from Peter to pay Paul." Therefore, it would be extremely helpful if your check could arrive as soon as practical. I certainly appreciate your willingness to continue to support our PCB research program. I believe our current lines of work have tremendous potential to save both your industry and our agricultural industry a great deal of money that would be spent in unnecessary waste disposal.

Sincerely,

L. B. Willett
Associate Professor
