PLAINTIFF'S EXHIBIT WV-01200

Dear Jon:

Attached is the information on the Asbestosis School sponsored by the City University of New York. Let me know as soon as you can whether or not you are going to attend. If you decide against it, then I'll have to decide whether or not I will represent our company.

John Vyverberg

Enclosure

3/30/70

① Talked by phone w JC today & indicated it would be unwise for either of us to attend for following reasons
a) The meeting will be a giant propaganda exercise
b) It will be directed only to asbestos
c) It will be for physicians & industrial hygienists only
d) Attendance would give tacit approval to Selikoff

② JC agreed that attendance would be unwise

Dear Jon:

We received a letter from Ervin J. Selikoff on the subject of Environmental Sciences Laboratory which will be conducted June 15-18, 1970. This course is at the Mount Sinai Hospital and deals primarily with asbestosis.

I am wondering if anyone from NEIA is to attend. Let's add this to our agenda at the March meeting.

Sincerely yours,

Walter Gubar
Laboratory Manager

MOUNT SINAI SCHOOL OF MEDICINE
of The City University of New York
FIFTH AVENUE AND 100TH STREET · NEW YORK, N.Y. 10029

Department of Community Medicine

March 13, 1970

Dear Sir:

Many of the health hazards associated with insulation work have only recently been defined and characterized. Therefore, much of the information is not widely known. This is unfortunate, since considerable progress is being made in developing appropriate controls to minimize or eliminate these hazards.

The Environmental Sciences Laboratory will conduct a postgraduate course reviewing knowledge in this field, intended primarily for physicians and other scientists concerned with the management, surveillance or protection of insulation workmen. It will be held at our institution June 15-18, 1970, and is described in the attached brochure.

The tuition for the course is $400, but because of the importance of the matter, the Page and William Black Postgraduate School of Medicine will consider the granting of scholarships to physicians, industrial hygienists or others concerned with the care and protection of insulation workmen. We would be pleased to consider your nomination for such a scholarship, of a physician or hygienist concerned with the health or protection of men employed by your company.

Others may, of course, apply for participation in the course. We would be prepared to send the descriptive brochure, at your request.

Sincerely yours,

I. J. Selikoff
